

Specific Reports Logged In User (My Contracts)

Purpose:

Creating this view, and sharing it with everyone in your organization, you can be sure that every user will have a view of all the contracts where they are listed as either the Owner, or one of the Responsible Parties.

Search Criteria:

The Criteria needed to make this View is very simple, but must be followed EXACTLY.

- You'll want to have Owner, PrimaryParty, SecondaryParty, & TertiaryParty as your criteria
- Then, for each, have **@LoggedInUser** set as the value to search by
 - This term will allow you to share this view out with your entire company, and the system will automatically filter this view based on the User who is Logged In.
- You NEED to set the And/Or dropdown to OR (A) for each one, otherwise the report will return
 no results.
- You can decide whether or not to enable the Include Archived checkbox

Report Set-Up:

You can use the Default Fields and Sort Order to make sure your report is always displaying with only the information you want, and sorted how you'd like.

We have our Grid set to show us the:

Contract Name | Owner | Effective Date | Expiration Date | Primary Party | Secondary | Tertiary

- If you have Include Archive selected, you'll want to include the Archived column in your Grid
- We then have it *Sorted* by the Contract Name, but it could be set on any of the other information we have displaying in our grid.
- You can adjust the information displaying in your grid exactly how you would any other Grid in UCM, doing so here will just make it so that everytime you are viewing this report it is set the same.

Sharing the Report:

- To have this View be sent out to all the users of your organization, you must first check the **Save This View** checkbox, and then the **Share View With Others** checkbox will appear.
- When you check that box, then check the Select All box above the list of your Users
 - SECURITY NOTE: When you SHARE a View, the system will automatically take into account the Users Folder Permissions, so there is no need to worry about a shared view allowing a User to see Contracts or Information that they shouldn't.
- This view will now appear in your Users Saved Views box on the Contracts Tab with a Red "S" in a white circle next to it's name, letting them know the View was shared with them.
